Even the name Steve Vai as a guest on **Lindsey Boullt** with CD can aufhorchen *Composition* and expectations in the air fast. In addition, among other musicians such as Richie Kotzen (Review [1](#), [2](#)), Joe Satriani, Jerry Goodman and Derek Sherinian (Review [1](#), [2](#), [3](#)) the musical jack in hand.

For class is at least in this direction have been provided. And the result disappointed me not. A new genre is born. Indian angehauchter Led Zeppelin Jazz Hard Rock, a striking name. Orchestral orgies, seasoned with outstanding solos, delight the ear and also at the hearing by multiple new audio impressions.

Individual tracks as examples picking is difficult for me. *Composition* is one of the CDs that you already own must listen to for "yes" or "no" to decide. For me personally, it has front to rear fallen almost without exception, and is not in the back of the rack dusty.
